

Healthcare is Everywhere – Student Worksheet

Did you know that healthcare is everywhere! Health is one of the few industries that is everywhere, in every region, every city and every town. No matter where you live, health care is needed. This creates so many opportunities across Australia and even around the world.

Healthcare is Everywhere an interactive learning resource to help you learn about the healthcare system and the variety of jobs available within the health industry. Take time to explore a hypothetical city and rural community by zooming in and scrolling around both settings to discover a range of health services and career opportunities available. Explore the *Healthcare is Everywhere* by scanning the QR Code!

JOBS IN HEALTH

Explore two health service buildings in the metropolitan city view and two health service buildings in the rural view and briefly describe one health job from each health service that you have not heard of before.

Health Service Building Name: _____

Job title: _____

Brief description:

PERSONAL SKILLS AND ATTRIBUTES

List some of the personal skills and attributes you would need to work in the health industry. Consider skills and attributes of both clinical health workers (i.e. individuals who provide direct medical care to patients) and non-clinical workers (i.e. individuals who work in health but do not provide direct medical care to patients).

YOUR DREAM JOB IN HEALTH

Describe your dream job in health. Consider where you might work, who you would work with and what you might do.

FINDING OUT MORE ABOUT CAREERS IN HEALTH

Who would you speak to at your school to find out more about careers in health?
